

COVID-19 Vaccine Update

We have received overwhelming demand for the Covid-19 vaccine and are grateful so many of our patients want it. We have everything in place to provide your vaccination except for the vaccine supply from the Arkansas Department of Health. The ADH is working on a plan to improve allocation to hospitals, but pharmacies are currently getting the majority of the supply allocations at this time. We suggest reaching out to your local pharmacy to schedule your vaccination until more vaccines are distributed to hospitals.

Due to the supply issue previously stated, we are unable to schedule new COVID-19 vaccinations. For the most up-to-date information on vaccine availability, please visit NEABaptistClinic.com or follow NEA Baptist on social media.

If you think you have been exposed to COVID-19 and have mild to moderate symptoms, call your clinic or 870-936-8000 or schedule a video visit through MyChart app or at NEABaptistClinic.com.
