11-15-2024 - Patient

Your Prescription for Good Health

Building a long-term, ongoing relationship with a Primary Care Physician or APRN can result in significant health benefits, including:

- **More accurate diagnoses** – A physician who sees you regularly is more likely to notice changes in your health. Better diagnoses are often the result.
- **Lower costs** – By seeing your physician on a regular basis, and calling him or her first when you have an urgent concern, you'll have fewer medical and ER visits.
- **Staying healthier** – Your physician can help you manage any chronic conditions you may have, and make personalized recommendations to improve your health.
- **Trust** – A Primary Care Physician sees you regularly and knows your medical history. Over time, it will be easier to discuss private medical concerns.
- **Referral to specialists** – If you need to see a specialist for a condition like diabetes, your physician will be able to refer you to the right person.

The list on the other side of this flyer features the excellent physicians and APRN's of NEA Baptist Clinic that are currently accepting new patients. If you do not have a primary care provider, we encourage you to call this week to establish with one at the location most convenient for you.
